ROLLERS

These are screen door roller assemblies, which are the widest used rollers used amongst the largest manufactures in the today's marketplace. The screen door rollers are assembled wire tension springs and comes with a 1" to 1-3/8" wheel diameter. Wheel material options include nylon, stainless steel, steel with Delrin, and steel ball bearing. We offer at least 20 possible combinations of rollers that work in tandem with a variety of corner inserts.
